FREE PROMPT · WORDSATSCALE

The Pay-Per-Call Marketplace Finder

Paste it into ChatGPT, Claude or Perplexity with web search on. It finds **who buys calls in your niche**, reads the fine print, flags the networks that won't pay, and finds local businesses to sell to direct.

My Ohio hoarding directory sells its leads **direct to a local company at $200 each**. This prompt finds the floor to price yours against.

1 Fill the 3 blanks 2 Turn on web search 3 Open every source

```
You are my pay-per-call research assistant. Find every pay-per-call network, marketplace or buyer that
could pay for phone calls from my site, check the fine print, and flag the risky ones. Use live web search.
Never answer from memory and never invent a payout, a rule or a URL.

MY NICHE: [e.g. hoarding cleanup]
MY LOCATION: [e.g. Columbus, Ohio, or US-wide]
MY TRAFFIC: [e.g. organic Google traffic to a local site, about 20 calls a month]

STEP 1. FIND THE CATEGORY
Most networks have no offer for a small niche. List the bigger categories a buyer already pays for that my
niche sits under (e.g. hoarding cleanup: junk removal, cleanouts, biohazard cleanup).

STEP 2. SEARCH
For my niche and each category, run:
- "[term] pay per call"
- "buy [term] calls"
- "[term] calls" publisher OR affiliate
- site:offervault.com [term] pay per call
Also check the eLocal public rate card for each category.

STEP 3. READ THE FINE PRINT
For each network or buyer, open its own page and return a table:
name | URL | type (network, marketplace, exchange, direct buyer) | matching offer | payout per qualified
call, with source and date | minimum call length | accepted hours and days | is SEO or organic traffic
allowed (quote the line) | hold period | payment schedule and minimum | what they ask for to apply.
Write "not published" for anything you cannot find.

STEP 4. RED FLAGS
Mark each network with any of these:
- Domain registered in the last 12 months (check RDAP)
- No named team or address, contact only by WhatsApp or Telegram
- Payout far above the others for the same category
- Reviews on Affpaying, Trustpilot or Reddit about bans at payout, calls marked unqualified after the fact,
or unpaid invoices (link them)
- A broker that will not name the end buyer
- Vague or missing rules for a qualified call

STEP 5. DIRECT BUYERS
List up to 10 local businesses in my niche and location that already pay for leads. Only count linked
evidence: they run Google Ads on my niche keyword, they appear in the Meta Ad Library, or they buy from a
lead platform. Give name, website, phone and the evidence link.

STEP 6. VERDICT
Sort the Step 3 table by payout, highest first, then give one paragraph: start with a network, a direct
buyer, or both, with the network as overflow. Name the highest published payout as my price floor for
direct deals. Use only numbers you found. End with every source URL.
